

Streamlining Annual Reporting Project

Steering Committee Update December 5, 2023

Karen Ashby, LWA
Dustin Bambic, Paradigm

“Need” for the Streamlined Annual Reporting Project

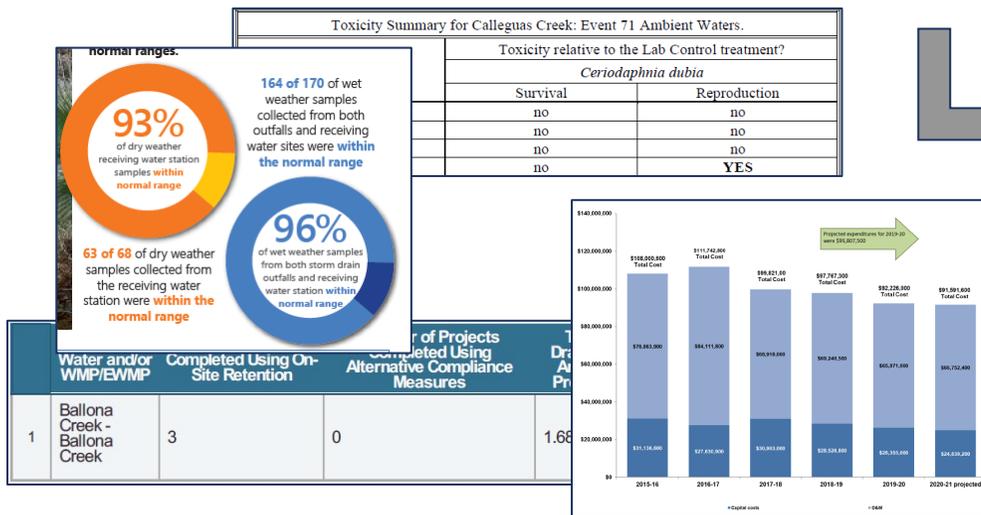

Regulated Community

- Spending months and \$\$\$\$ on development of reports
- Desire to focus on high value metrics, reduce reporting on every implementation activity
- Unclear how reports are used by Regional Boards or others

		Control Measures	Projected Completion (Date)	Actual Completion (Date)	Status of Implementation	Status of Funding
1		Burton Way Median Green	September 2021		100% Design and Construction to begin	Capital Improvement Project Funding. Grant funding pending.

Event ID	Site ID	QA/QC Sample Type	Analysis Date	Classification	Constituent	Fraction	Sign	Result
2019/20-1	000NONPF	matrix spike, rec	1/22/2020	Metal	Barium	Total	=	118
2019/20-1	000NONPF	matrix spike dup	1/22/2020	Metal	Barium	Total	=	190
2019/20-1	000NONPF	matrix spike dup						
2019/20-1	000NONPF	matrix spike, FG						
2019/20-1	Lab	method blank						

Water Quality Monitoring Frequency				
Monitoring Program	Sampling Requirements	Monitoring Type	Frequency Required	Monitoring Accomplished
LIP Program Elements		FY 2019-20	Projected Costs FY 2020-21	
Public Projects - BMPs		\$17,873,000	\$18,770,900	Quarterly
Construction BMPs for Public Construction Projects		\$3,272,600	\$1,742,500	Quarterly

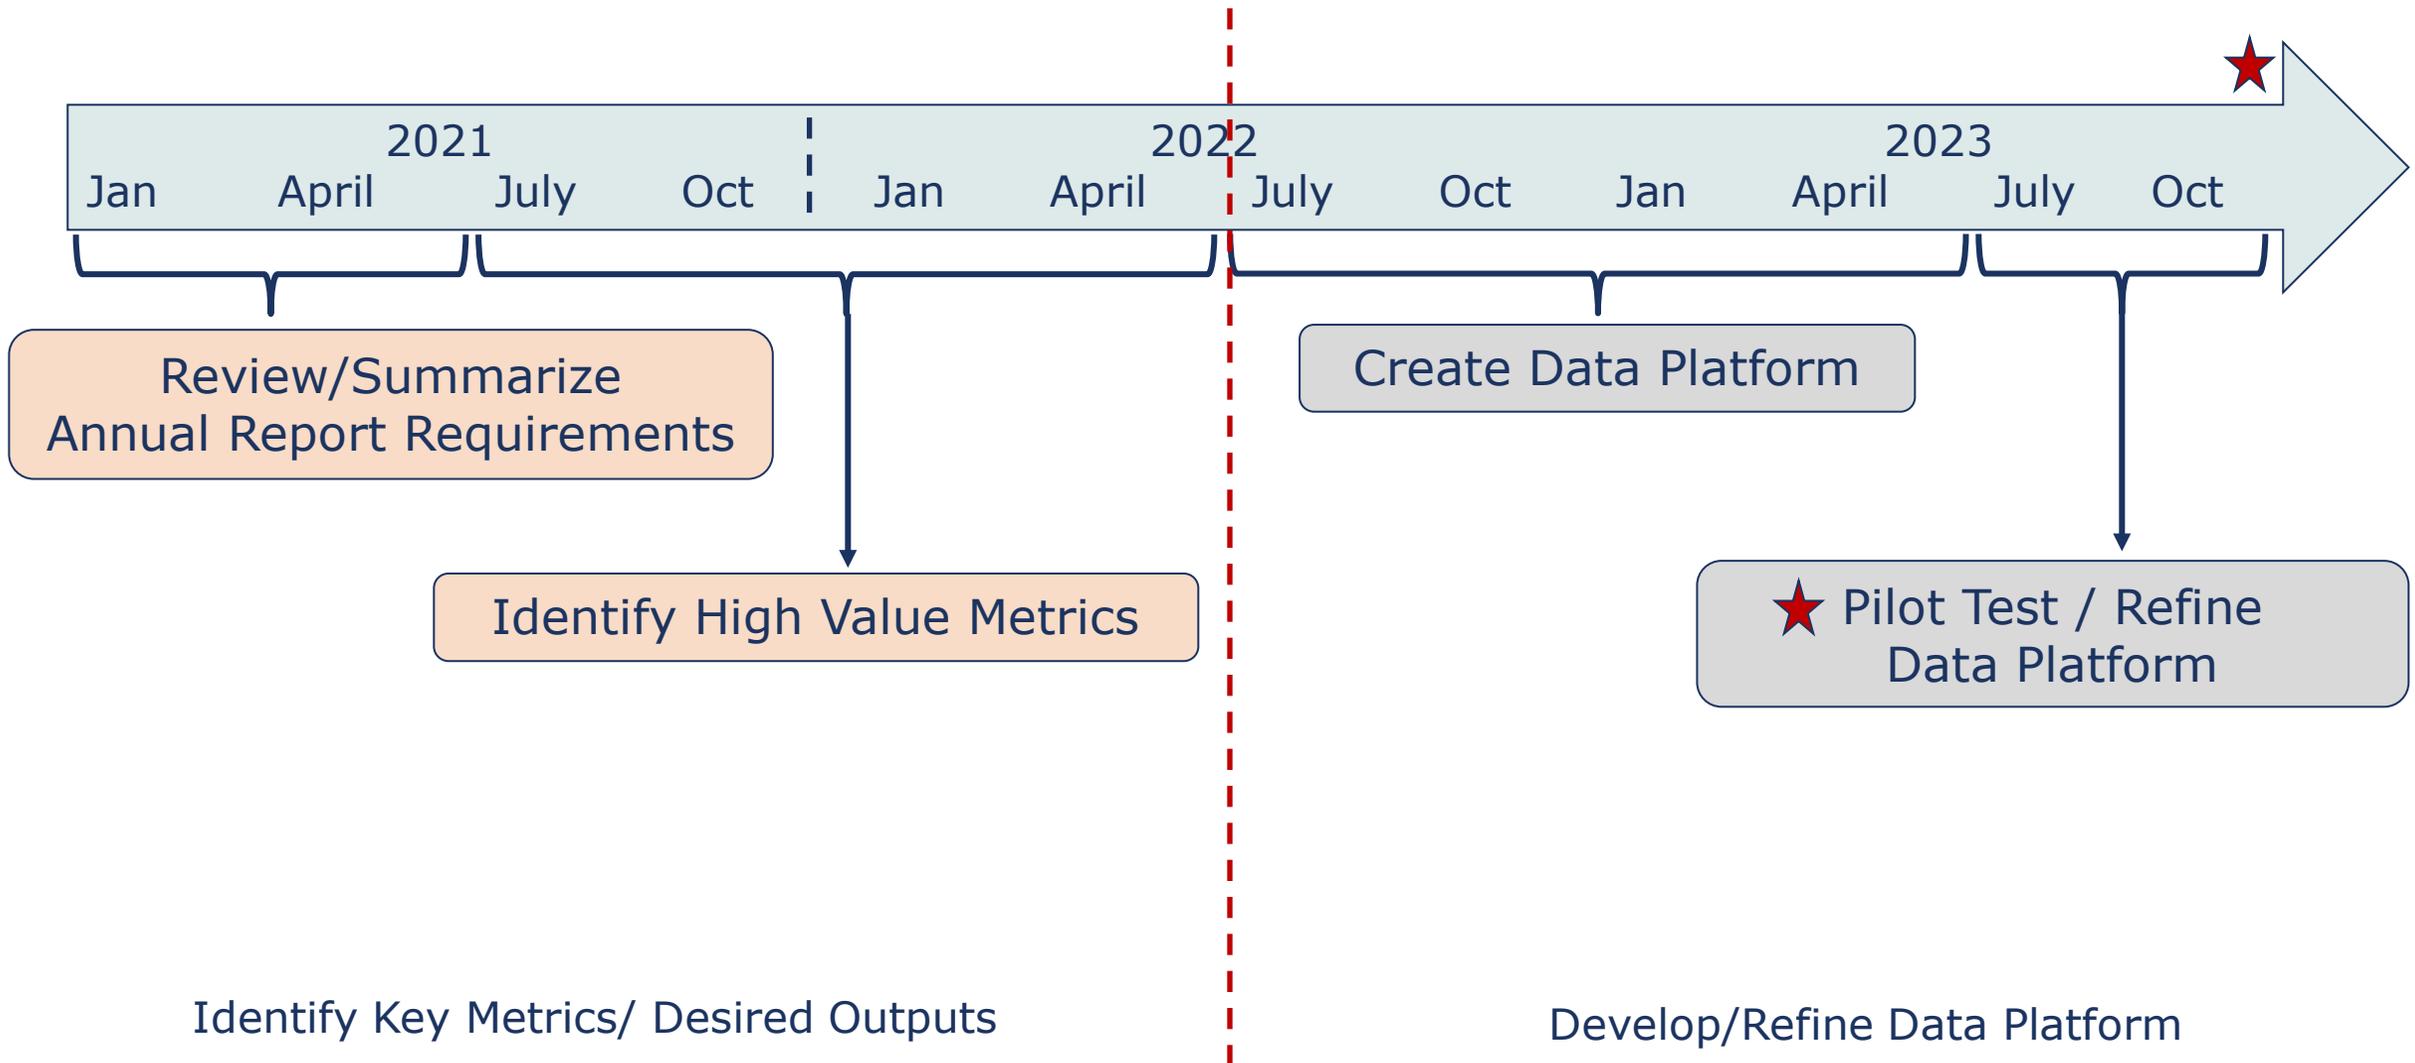

Regulators

- Reports are voluminous (100s-1000s pgs)
- Difficult to read and identify progress
- Hard to communicate information/ key points to the public
- Desire to be able to find data as needed in future

SMC Streamlining Annual Reporting Project Overview

– Four Main Project Tasks

Task 1 - Establish Project Focus Group

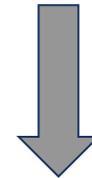

- City of Los Angeles Watershed Protection Division
- City of Long Beach
- City of San Diego
- Orange County Public Works
- County of San Diego Watershed Protection Program
- San Bernardino County Flood Control District
- Los Angeles County Flood Control District
- Riverside County Flood Control and Water Conservation District
- Ventura County Watershed Protection District
- California Department of Transportation

- Los Angeles Regional Water Board
- Santa Ana Regional Water Board
- San Diego Regional Water Board
- State Water Resources Control Board
- USEPA Office of Research and Development

- Southern California Coastal Water Research Project

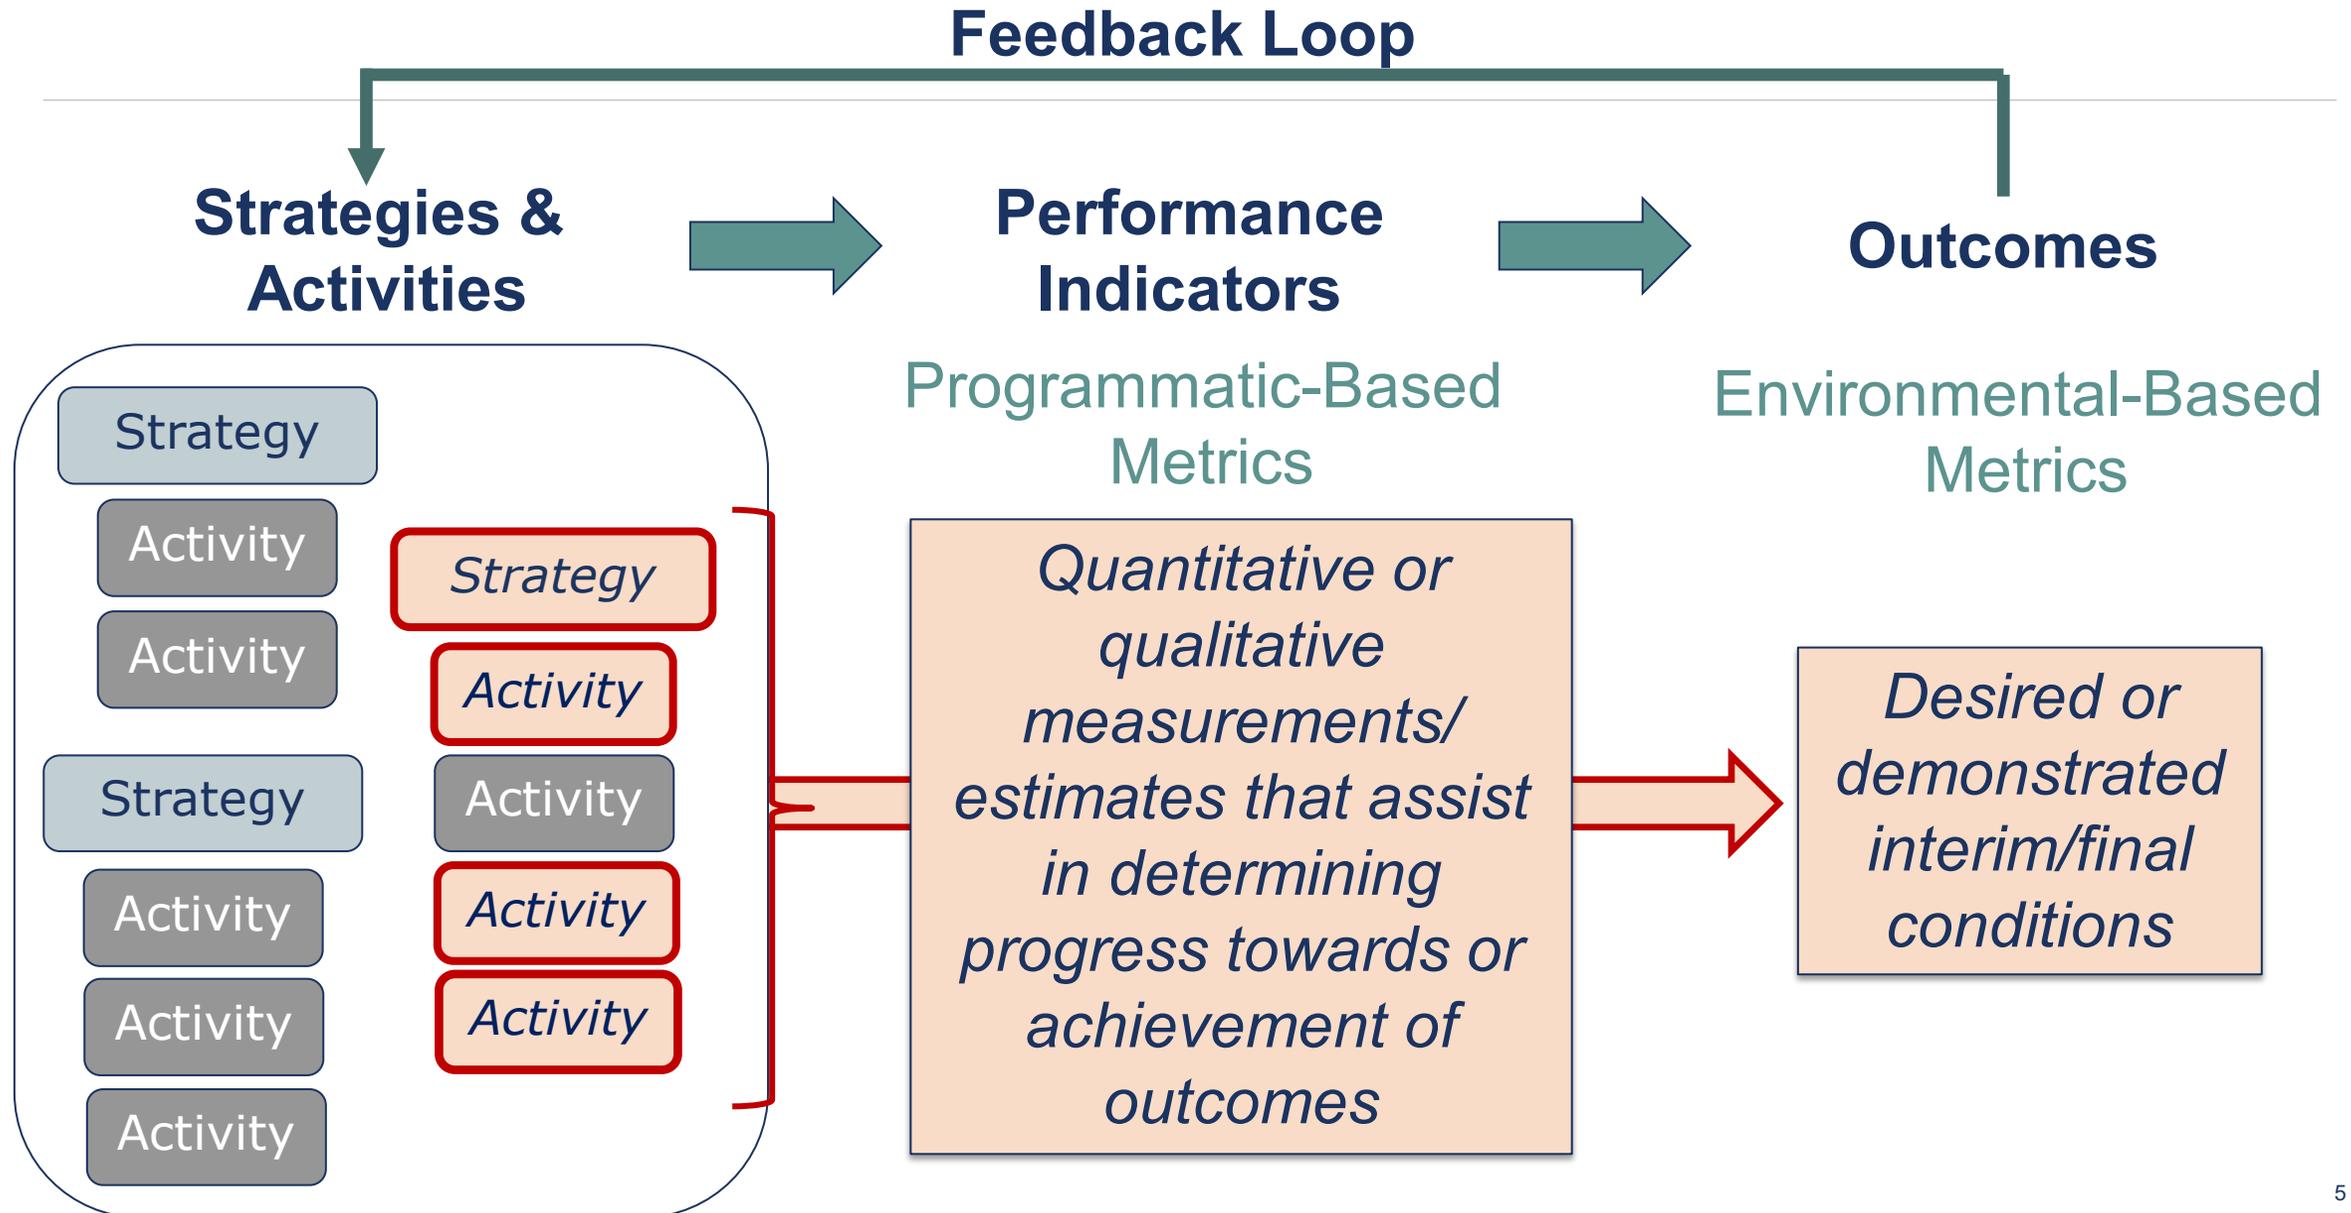

Steering Committee

Project Focus Group

Use of Annual Reporting Data and Information

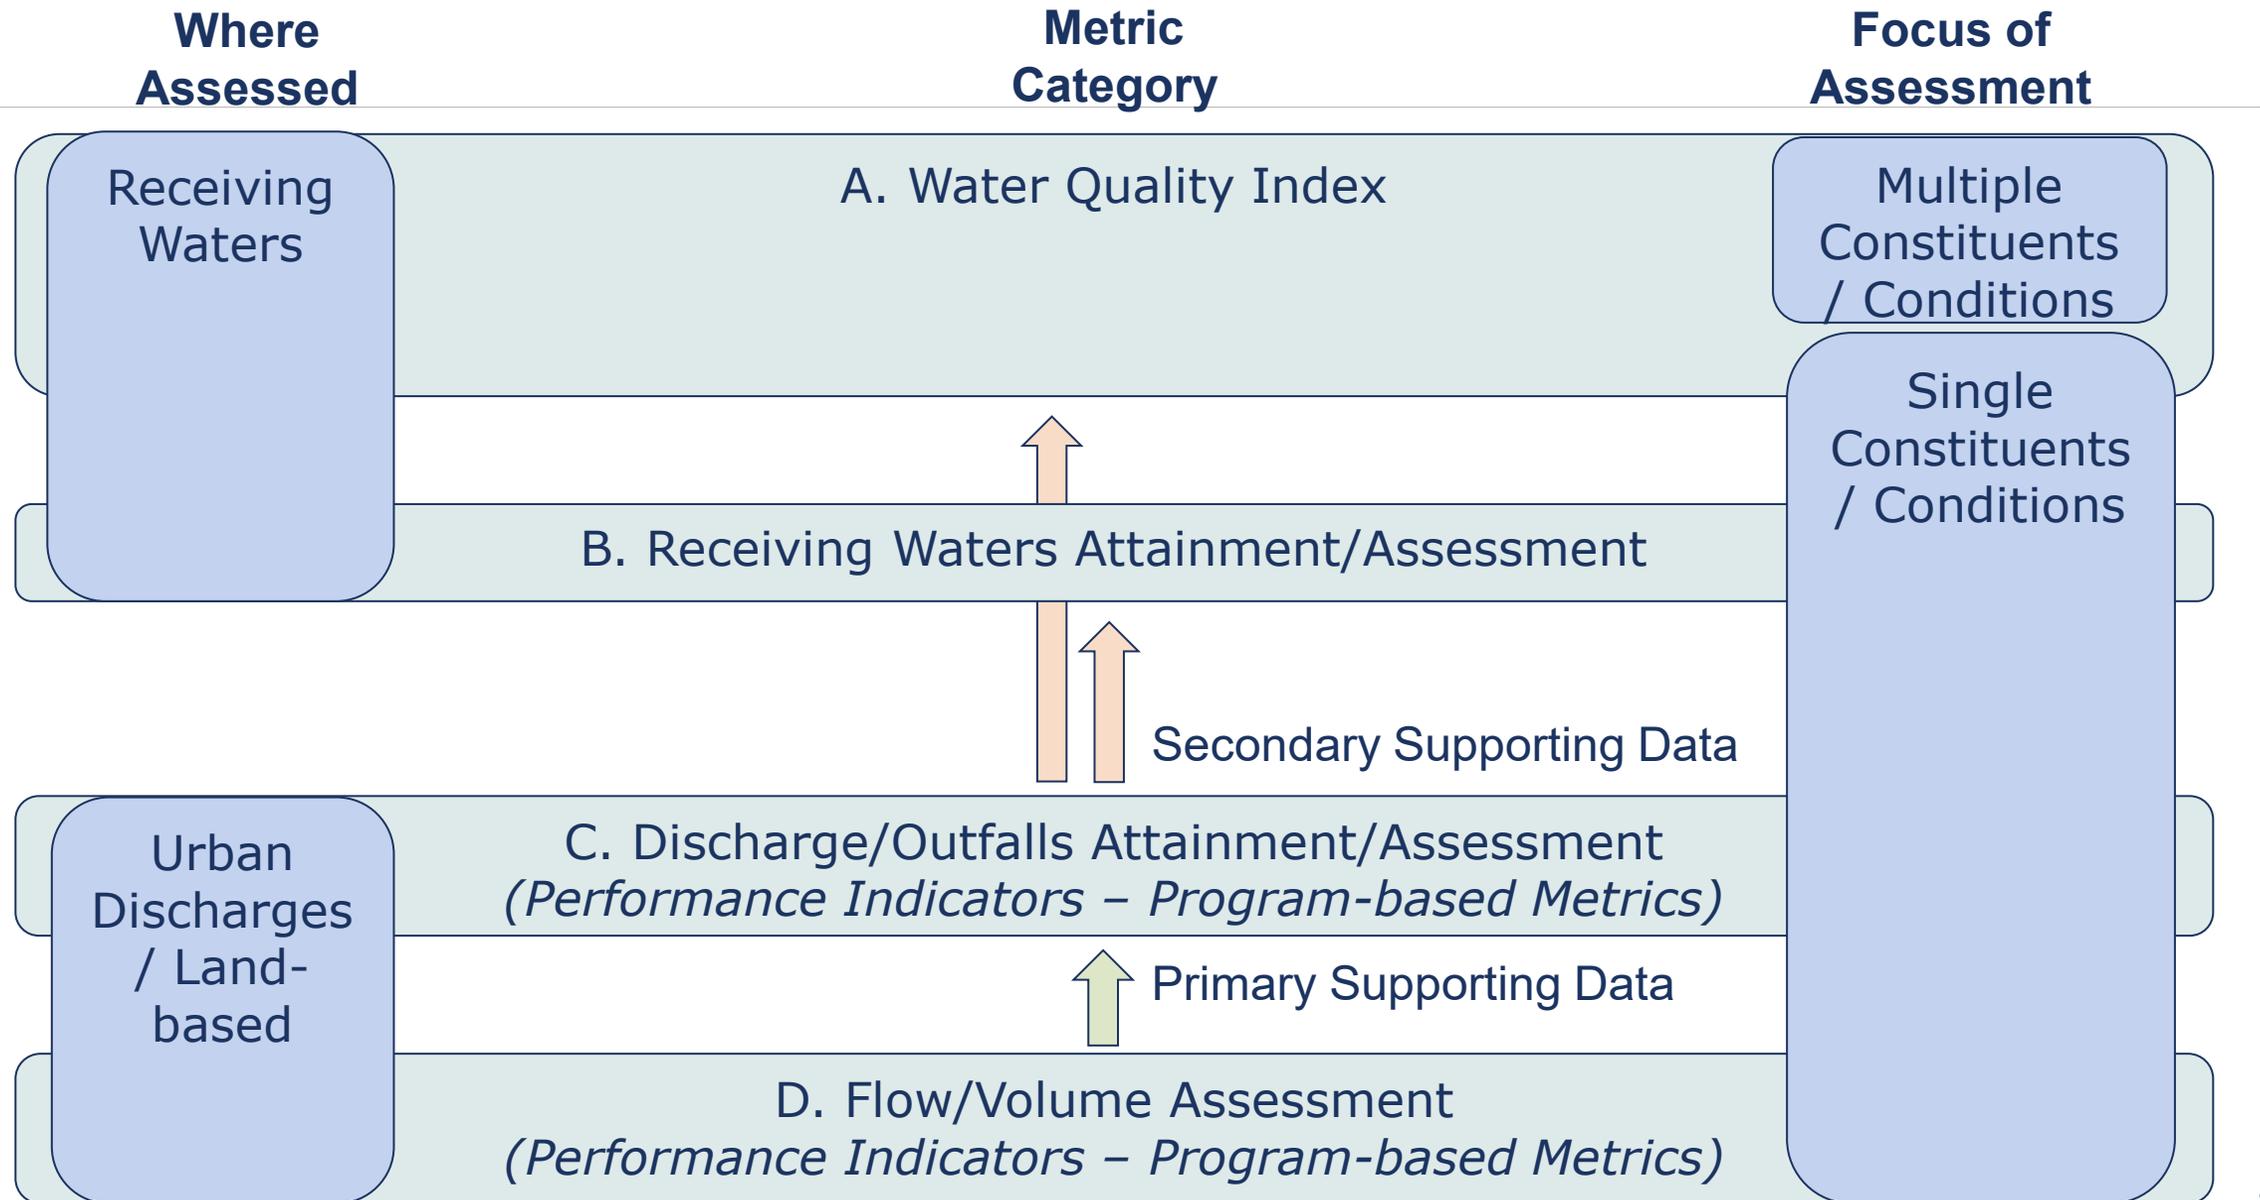

Outcomes/Env Metrics

Related Management Questions

Flow/Volume Assessments - Land-Based	Management Questions
Summarization/comparison of information over time	1. In the Southern California region, what are the trends for flows from outfalls/discharges? In dry weather? (for one year and trends over time)
	In wet weather? (for one year and trends over time)
Summary of Information	2. In the Southern California region, what is the total volume that has been diverted, infiltrated, treated?

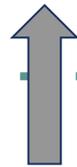

Annual	II. Volume/Flow [Specific Performance Indicator(s) TBD]		
	Total volume of dry weather runoff diverted, infiltrated, treated to date (ac-ft)	Performance Indicators	
	Total volume of wet weather runoff diverted, infiltrated, treated to date (ac-ft)		
	Calculate - Average volume/acre		
	Primary Metrics		
	Wet Weather	Year to date rainfall (inches)	
		LID projects - number, acres, capacity, capture volume	
		Treatment controls - number, acres, capacity, capture volume	
		Green streets projects - number, acres, capacity, capture volume	Program-based Metrics
		Regional projects - number, acres, capacity, capture volume	
		Total volume diverted - diversions (ac-ft)	
	Dry Weather	Total number & % of outfalls with flows (selected outfalls)	
		Total volume diverted - low flow diversions (ac-ft)	
	Secondary Metrics		
		Total number of New Development/Redevelopment Priority Projects approved	
		Total number of New Development/Redevelopment Priority Projects completed	
		Total number of LID projects, treatment controls, green streets projects, regional projects, low flow diversions (and locations - mapped)	

Task 3 – Identify High Value Metrics

Steering Committee Approval (June 2022)

- Approval of metrics identified by the Focus Group
 - Outcomes – Environmental-based Metrics
 - Performance Indicators – Program-based Metrics

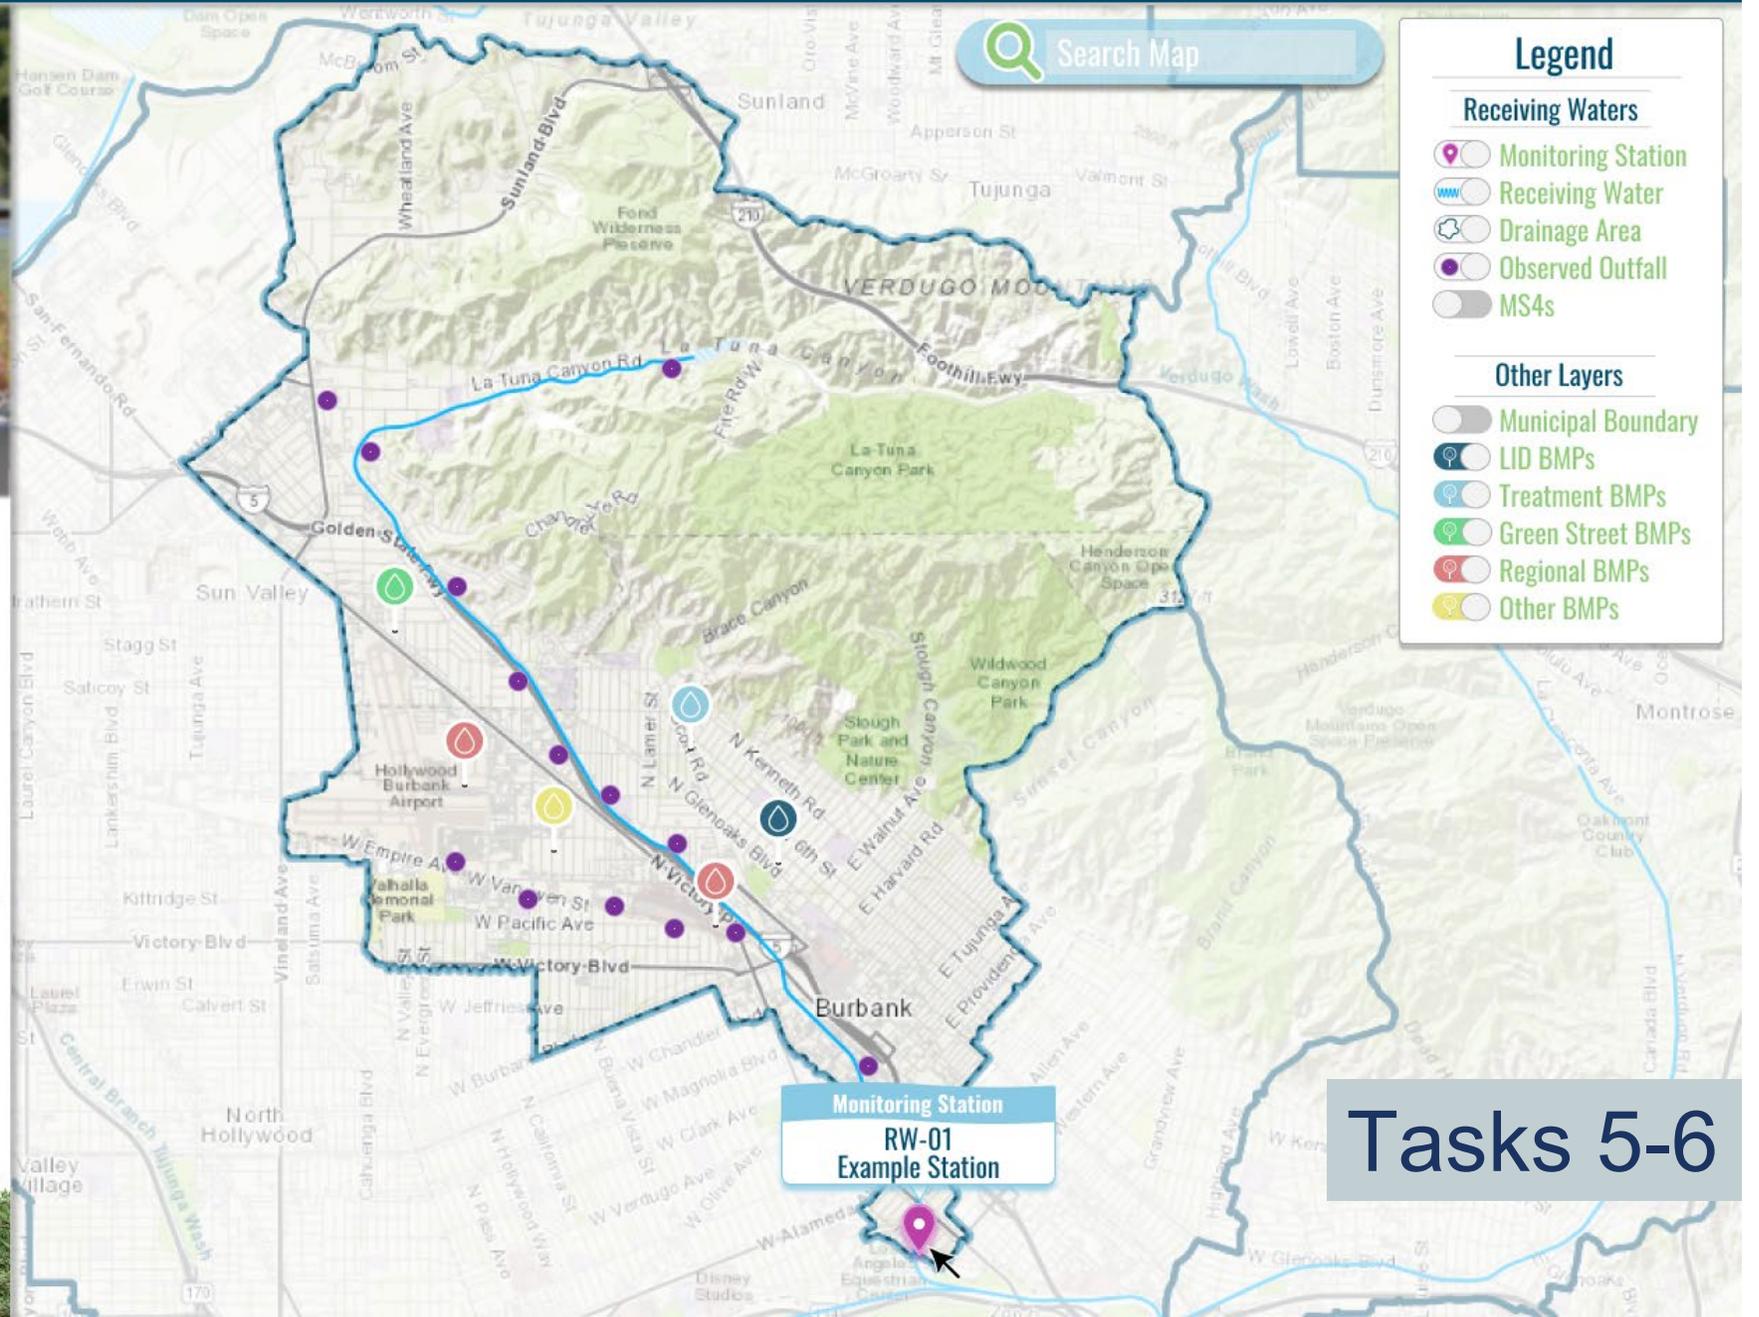

- Need commitment from Steering Committee members to allow for streamlining
 - Regulated entities – commitment to collect and analyze the data necessary for the use of the metrics
 - Regulators – commitment to investigate a different approach for annual reporting that is focused on the use of the metrics (could be a pilot program to test out approach)

SMC Streamlined Annual Reporting Platform

Visualize, Edit, and Review Annual Reporting Data

This platform is a repository for assessing watersheds and the protection of beneficial uses provided by stormwater programs across Southern California.

Please explore the map to the right to understand key water quality metrics water as conveyed by monitoring programs, along with the benefits provided by stormwater infrastructure projects.

Tasks 5-6

Summary of Potential Alternatives (October 24, 2023)

SMC Focus Group Feedback

Pursue Near Term
(23-24/24-25)

Consider Long Term
(After 2025)

	No	Pursue Near Term (23-24/24-25)		Consider Long Term (After 2025)
	#1 No Project	#2 Limited Use	#3 Full Use	#4 Enhanced Use
Use of Platform / User Interface	Not Used	Used by Some SMC Members	Used by All SMC Members	Used by All SMC Members
Platform is Modified/Enhanced	---	---	---	Yes
Discussions with Regional Boards for Use of Platform / Reporting	---	Yes	Yes	Yes
Discussions with State Water Board regarding e-Reporting	---	Yes	Yes	Yes
Benefit of Alternative	---	Limited	Moderate	High

Steering Committee “Ask”

Support the SMC Focus Group and Project Team to.....

- Continue to collaborate with the Regional Boards to garner support for this streamlined reporting framework and build in language during permit renewals
- Continue to collaborate with the State Water Board regarding the future e-Reporting requirements (due Dec 2025)
- Find opportunities to leverage the Platform outputs and replace key sections/ attachments in current annual reports or for specific reporting programs

Once the framework is adopted / platform is being leveraged - additional core functionality / data processing capabilities could be considered
